इको फ्रेंडली होळी....

नैसर्गिक रंगासोबत.....

रंग प्रेमाचा, रंग स्नेहाचा, रंग नात्यांचा, रंग बंधांचा,
रंग हर्षाचा, रंग उल्हासाचा, रंग नव्या उत्सवाचा....

पण कधी कधी रंगाचा बेरंग होतो, रासायनिक रंगामुळे मोठ्या प्रमाणात प्रदूषण होते व विविध आजार उद्भवतात. चला तर या होळी व रंगपंचमीला संकल्प करूया, नैसर्गिक रंगांचा वापर करुन पर्यावरण पुरक होळी व रंगपंचमी खेळूया.....

- > वृक्ष जीवन आहे त्याला नष्ट करू नका.
- > एक गाव एक होळी व छोटी होळी करूया.
- > होळी निमित्त झाडे लावा, झाडे जगवा हा संकल्प करूया.

रासायनिक रंगामध्ये विविध घातक रसायने असतात, जसे काळा रंग (ऑक्साइड), निळा रंग (प्रशियन नीळ), हिरवा रंग (कॉपर सल्फेट). त्यामुळे रासायनिक रंग वापरणे धोक्याचे आहे. होळी व रंगपंचमीला वनस्पतीची पाने, फुले, फळे वापरून विविध नैसर्गिक रंग तयार करू शकतो. झाडांची फुले जसे की गुलाब, जास्वंद, पळस, झेंडू त्याचप्रमाणे हिरव्या भाज्या (पालक, मेथी, बीट), हळद, बेल फळ, आवळा फळ तसेच गहू व ज्वारी यांची पाने वापरून सुद्धा रंग तयार करू शकतो.

Activity:- Poster competition on “ Fungi for Agriculture”

Date: 28/09/2022

Venue: Department of Botany

Participants: Students of various colleges

Objective:-

1. To aware the students regarding importance of fungi.
 2. To encourage students for mycological research.
 3. To motivate students for spreading knowledge about use of fungi in agriculture.
-

Program Highlights:-

Fungi are very well known for its pathogenic and saprophytic activity. In our day to day life we are facing many problems caused by various fungi like- food spoilage, fruit spoilage etc. To control the damage done by various pathogens along with fungi, farmers use various type of pesticides, insecticides and pesticides. The excessive use of such chemical pesticides shows negative impact on human health. Now a day to fulfill the requirement of increasing population, farmers use differential chemical fertilizers to increase the productivity. Use of such fertilizers reduces the soil fertility, increase the salinity of soil. For that shake we require an alternative for this, to retain the soil fertility, and getting healthy food. Use of biofertilizers and biopesticides instead of chemicals is an good alternative to achieve above goal. Differential techniques of integrated pest management also help to minimize the attack of pathogens. By considering above need and requirement, Department of Botany, Arts &Commerce College WarwatBakal and Mycological society of India, Amravati unit took initiative to aware peoples about use of fungi to increase the agricultural productivity. A poster

competition were organized at Department of Botany, Arts & Commerce College, on “Fungi for Agriculture”. 57 participants have actively participated in this competition and made posters on various aspects of fungi. Program was inaugurated with the presence of Mr. Krushnaraoji Ingle ex MLA and President of Satpuda Education Society, JalgaonJamod. In his talk he explained the importance of differential agricultural practices for increasing the productivity. He shares certain examples during his education as well as farmers experiences during cultivation practices with students. In the introductory speech Mr. S. S. Mhasal, Head Department of Botany, emphasized on the commercial importance of fungi in the field of agriculture, industry and medicines. Use of Mycorrhiza forms a colonization with roots of crop plant and increases its absorption capacity, will help to getting water and minerals. Use of Trichoderma instead of chemical pesticides restricts the growth of many fungi to retain the yield. In the presidential speech Dr. R. S. Korde, Principal, Arts &Commerce College, guided the students and motivated them to participate in such activity. They inspire students to spread the knowledge about use of fungi during farming. To participate in such extension activities and aware people about the use of biopesticides as well as biofertilizers is our social responsibility. Program was anchored by Dr. K. B. Theng and Dr. D. K. Sherkar propose vote of thanks. All the teaching and non-teaching staff members took painstaking efforts for the successful completion of this program.

Some Glimes

Program Outcomes:-

- 1) Students get motivated for participation in extension activities.
- 2) Students got aware about the use of biopesticides and biofertilizers.
- 3) Increases knowledge regarding the hazardous effect of chemical pesticides and fertilizers.
