Remark	<p>On the occasion of wild life week Department of Zoology organized various activities in the college. National wild life week is celebrated from 2 to 8 October every year in India. This week aims at protecting and preserving India's flora and fauna. Wild life week was conceptualized in 1952 with a long-term goal to safeguard the lives of the endangered and threatened species of animals.</p> <p>So to celebrate this wild life week we organized Guest lecture of Miss Prajakta N. Bathe , Head and Assistant professor of Zoology of B. S. Patel Arts, Commerce and Science college, Pimpalgaon Kale, Tq. Jalgaon Jamod Dist. Buldhana on 4th oct at 11.50 AM on Topic “ Animal diversity from Non-Chordates to Chordates”. She gave enthusiastic and informative lecture on diversity of animal. Principal Dr. Korde sir was president of the programme, he told the students about the</p>

importance of Wild life and asked students to protect the wildlife.

Outcomes:

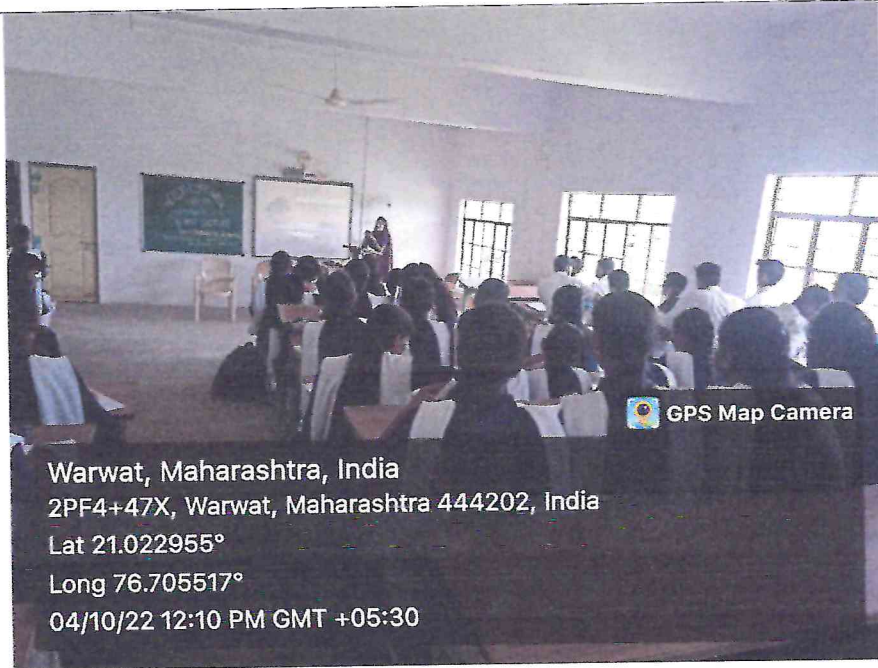

- 1. Guest lecture created awareness about conservation and protection of wild life.
- 2. Guest lecture inspired students about possible future in wild life conservation.
- 3. It broaden students horizons to see the world outside of their classroom

Collaboration with

Mycological society of India, Amravati unit

Activity:- Poster competition on “ Fungi for Agriculture”

Date: 28/09/2022

Venue: Department of Botany

Participants: Students of various colleges

Objective:-

1. To aware the students regarding importance of fungi.
2. To encourage students for mycological research.
3. To motivate students for spreading knowledge about use of fungi in agriculture.

Program Highlights:-

Fungi are very well known for its pathogenic and saprophytic activity. In our day to day life we are facing many problems caused by various fungi like- food spoilage, fruit spoilage etc. To control the damage done by various pathogens along with fungi, farmers use various type of pesticides, insecticides and pesticides. The excessive use of such chemical pesticides shows negative impact on human health. Now a day to fulfill the requirement of increasing population, farmers use differential chemical fertilizers to increase the productivity. Use of such fertilizers reduces the soil fertility, increase the salinity of soil. For that shake we require an alternative for this, to retain the soil fertility, and getting healthy food. Use of biofertilizers and biopesticides instead of chemicals is an good alternative to achieve above goal. Differential techniques of integrated pest management also help to minimize the attack of pathogens. By considering above need and requirement, Department of Botany, Arts & Commerce College Warwat Bakal and Mycological society of India, Amravati unit took initiative to aware peoples about use of fungi to increase the agricultural productivity. A poster competition were organized at Department of Botany, Arts & Commerce College, on “ Fungi for Agriculture”. 57 participants have actively participated in this competition and made posters on various aspects of fungi. Program was inaugurated with the presence of Mr. Krushnaraoji Ingle

ex MLA and President of Satpuda Education Society, Jalgaon Jamod. In his talk he explained the importance of differential agricultural practices for increasing the productivity. He shares certain examples during his education as well as farmers experiences during cultivation practices with students. In the introductory speech Mr. S. S. Mhasal, Head Department of Botany, emphasized on the commercial importance of fungi in the field of agriculture, industry and medicines. Use of Mycorrhiza forms a colonization with roots of crop plant and increases its absorption capacity, will help to getting water and minerals. Use of Trichoderma instead of chemical pesticides restricts the growth of many fungi to retain the yield. In the presidential speech Dr. R. S. Korde, Principal, Arts & Commerce College, guided the students and motivated them to participate in such activity. They inspire students to spread the knowledge about use of fungi during farming. To participate in such extension activities and aware people about the use of biopesticides as well as biofertilizers is our social responsibility. Program was anchored by Dr. K. B. Theng and Dr. D. K. Sherkar propose vote of thanks. All the teaching and non-teaching staff members took painstaking efforts for the successful completion of this program.

Some Glimpse:

Program Outcomes:-

- 1) Students get motivated for participation in extension activities.
- 2) Students got aware about the use of bio pesticides and bio fertilizers.
- 3) Increases knowledge regarding the hazardous effect of chemical pesticides and fertilizers.
