

ABOUT INDUCTION PROGRAMME:

The admissions process for new students to a new college is a significant turning point in their academic careers. The transitional phase between high school graduation to obtaining a bachelor's degree, such as a B.A., B.COM., or BSC., or undergraduate studies at a college or university is referred to as the "stage from HSC to degree." They might not be familiar with how things operate right now or with the college's objectives, vision, mission, or rules. Due to this, they may feel alien in their new surroundings. As a result, individuals could experience a variety of restrictions and feelings of tension or anxiety. Because it may make it more difficult for them to study, this can be an issue. To help them adjust and feel more comfortable, Arts & Commerce College Warwat Bakal follows a process called induction or orientation set SGBAU guidelines. After HSC students enter college life, an induction program of our college plays an important role in helping them transition smoothly into their new academic environment. Arts & Commerce College Warwat Bakal uses a procedure called induction or orientation that complies with SGBAU requirements to assist students in adjusting and feeling more at ease. An introductory program at our college helps HSC students adapt successfully into their new academic environment after they begin college life. Administrators, instructors, and staff from the college give information about academic programs, course requirements, class schedules, campus amenities, libraries, extracurricular activities, and student support services during the induction event. The program might also include advice on time management, time management techniques, and other crucial abilities for academic success.

The program can lessen any challenges, concerns, and stress that students may experience when transferring to college by offering essential information and support.

As a result, they may be more effective as learners and have a more successful college career as a whole. College-level induction programs serve the objective of acquainting new students with the processes, resources, policies, and expectations of the institution. It aids in their familiarization with the college campus, its amenities, and the available support services. It functions as a formal introduction to the college and its operating procedures.

The intention is to educate and assist the newcomer so they may better grasp how things operate and fulfil their job as a student. The institution intends to assist the new student in settling in and learning by filling up this information gap and lowering the stress and strain.

AIM & OBJECTIVES OF IP: Students' actual transition from high school to college and preparation for both theoretical and individual achievement are maintained by the induction program. The program's aims and objectives are to accomplish the following main goals:

- This IP assists students in acquainting themselves with the college environment, including the campus facilities.
- The general goal of the induction program is to make sure that incoming students change into college or university life successfully and smoothly.
- This program creates the environments for students to flourish knowledgeably, socially, and personally throughout their degree program by bridging the information gap between academic and personal growth.
- It familiarizes them to the environment of the campus, as well as the locations of the library, and computer laboratories.
- This program gives students significant details regarding their degree requirements, academic programs, certificate courses option and registration procedures.
- Students are able to learn about college code of conduct.
- Academic advising, mentor mentee counselling, career guidance tutorial and seminar, remedial classes, and other support services such as MPSC classes are just a few of the ones that the program makes students aware of.
- This program introduces students to the college's culture, values, and community.
- Opportunities will be made available to interact with alumni current students, faculty, and staff in this program which in turn will helps the students build a sense of belonging and develop relations within the college community.

- This program also focuses on personal development, providing guidance on study skills, time management, goal setting, and overall well-being.
